SUMMARY

Full-stack developer with hands-on experience building and shipping production-ready web applications using the PERN stack (PostgreSQL, Express.js, React, Node.js), in both JavaScript and TypeScript. Demonstrated ability to integrate third-party APIs, design relational databases, and implement secure authentication systems. Quick to pick up new technologies — currently expanding into cloud infrastructure.

Education

Addis Ababa University - Addis Ababa, Ethiopia

Bachelor of Science in Computer Science

Expected Graduation: 2027

NOTABLE PROJECTS

BOOKish - Node.js, Express, PostgreSQL, Google Authentication, EJS, CSS

- Developed a full-stack web application for searching and organizing books
- Integrated Google Books API to fetch and display structured data dynamically
- Implemented secure authentication using Google OAuth 2.0
- Designed relational database schema in PostgreSQL to manage user-specific reading lists
- Built RESTful routes and server-rendered views using Express.js and EJS

CineRate - PERN Stack, Google Authentication, Tailwind CSS, JWT

- Built a full-stack social platform for movie discovery and user-generated reviews
- Integrated TMDB API to display trending, top-rated, and detailed movie information
- Implemented features including user ratings, reviews, watchlists, and activity tracking
- Developed RESTful APIs for handling user data and interactions
- Designed responsive UI using Tailwind CSS for improved user experience

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Java, C++, SQL
- **Frameworks:** React, Node.js, Express
- **Databases:** PostgreSQL
- **Web Technologies:** HTML, CSS, Tailwind CSS, Bootstrap, EJS
- **Tools:** Git, GitHub, Postman, VS Code
- **Core Concepts:** Data Structures & Algorithms
